

## Technical Bulletin **Replacing a CE board** with a MX box

Technical Bulletin N°:CTB1045Date of issue:09/07/12Revision:1.0Author:P.Foy

Compac Industries Ltd. 52 Walls Road, Penrose, Auckland 1061, New Zealand. P0 Box 12 417, Penrose, Auckland 1642, New Zealand. Tel: +64 9 579 2094 Fax: +64 9 579 0635 info@compac.co.nz www.compac.co.nz

## Scope

This document is to explain how to install the Compac MX box in an OPT that had a CE board. This will need to be done when a CE bopard fails as they are no longer available and must be replaced with the later MX box hardware. The software inside the box is the same but the layout and connections are in different places.

This Technical bulletin deals with the hardware differences only and not the software configuration. As the setup and configuration can change from customer to customer you will need to contact the helpdesk to plan out and install each upgrade.

## Power

The Compac MX Box is powered by 12 volts not 5 volts like the existing CE board.

When upgrading the to the Compac MX Box you will need to Remove the 5 volt power cables connected to CON4 on the UPS board as they are no longer required.

5 volt power wires to be removed ( Orange and Black connected to Con4)

After the 5 volt power cable has been removed the12 volt Compac MX Box cable can be installed. This is to be installed into the 12 volt DC supply terminals on the UPS board. The leads on the Compac MX box power jack will be labelled "12 volts" (White wire) and "GND" (Black wire).

The Compac MX box can be wired into any spare 12 volt connector. The picture above shows it connected to CON8

## **Communications**

The Compac MX box needs to have the following plugs connected. All other connections are not needed when using the Compac MX Box.

The Network cable position on the CE board

The Pinpad Cable position on the CE board

The Network cable position on the Compac MX box

The Pinpad Cable position on the Compac MX box (com 1)

The Cardreader Cable position on the CE board

The Cardreader Cable position on the Compac MX box Note the cover may have to be removed to get the plug in (com 2)

Helpdesk assistance For any further queries regarding the above Service Advisory, contact the Compac Helpdesk on +64 9 579 1877 (Worldwide) or 1800 145 887 (Australia) helpdesk@compac.co.nz
